COFCO Grains & Cereals - COFCO Corporation

A cereal is any grass cultivated for the edible components of its grain (botanically, a type of fruit called a caryopsis), composed of the endosperm, germ, and bran. The term may also refer to the resulting grain itself. Cereal grain crops are grown in greater quantities and provide more food energy worldwide than any other type of crop and are therefore staple crops.

Cereal - Wikipedia

Breakfast cereal (or simply cereal) is a traditional breakfast food made from processed cereal grains and often eaten for breakfast, primarily in Western societies. It is most often mixed with milk, but can also be eaten with yogurt or fruit. Some companies promote their products for the health benefits from eating oat-based and high-fiber cereals. In the United States, cereals are often ...

Breakfast cereal - Wikipedia
