

Clojure Reactive Programming

Clojure Reactive Programming

Clojure (/ ' k l oʊ ʒ ə r /, like closure) is a modern, dynamic, and functional dialect of the Lisp programming language on the Java platform. Like other Lisps, Clojure treats code as data and has a Lisp macro system. The current development process is community-driven, overseen by Rich Hickey as its benevolent dictator for life (BDFL).. Clojure advocates immutability and immutable data ...

ReactiveX

In computer programming, data-driven programming is a programming paradigm in which the program statements describe the data to be matched and the processing required rather than defining a sequence of steps to be taken. Standard examples of data-driven languages are the text-processing languages sed and AWK, where the data is a sequence of lines in an input stream - these are thus also ...

Scale. Eclipse Vert.x is event driven and non blocking. This means your app can handle a lot of concurrency using a small number of kernel threads. Vert.x lets your app scale with minimal hardware.

Eclipse Vert.x

Vert.x is an open source, reactive, polyglot toolkit or platform running on the Java Virtual Machine. You can think of Vert.x as an alternative to the Java Enterprise Edition but with a different approach to solving the same problem - developing networked, highly concurrent applications.

Is there a good library for functional programming in Java? I'm looking for stuff like Predicate and List.Find() (as a static method). Not complicated to implement, but it would be nice to find a reusable library here.

Functional Programming in Java - Stack Overflow

I've been working on a iPhone game (NineSpeed) on and off for a while - although recently it has been mostly off. So when I got an email from Apple last Wednesday, telling me to submit my game by Monday to get in the app store for launch, then this spurred me into some kind of action.

Fluentd uses MessagePack for all internal data representation. It's crazy fast because of zero-copy optimization of msgpack-ruby. Now MessagePack is an essential component of Fluentd to achieve high performance and flexibility at the same time.

MessagePack: It's like JSON. but fast and small.

Backend API Development. Agilogy does not build websites but fully functional Web Applications. We are specialists in backend API development. Either as a stand-alone product or as the backend for a mobile or web application, a top quality API is critical if managing data is important to your business.
