### **Evolution And Prehistory The Human**

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus *Homo*—and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family, the great apes. This process involved the gradual development of traits such as human bipedalism and language, as well as ...

Around 13,000 years ago, the Earth burned. A swarm of comet debris from the Taurid meteor stream had blasted the Americas and parts of Europe; the worst day in prehistory since the end of the ice age. Many species of large animal were exterminated by the conflagration and ensuing cataclysms. And those that survived the initial onslaught could do little against the floods, acid rain, and ...

What is Anthropology? What is Anthropology? Are you as interested as I am in knowing how, when, and where human life arose, what the first human societies and languages were like, why cultures have evolved along diverse but often remarkably convergent pathways, why distinctions of rank came into being, and how small bands and villages gave way to chiefdoms and chiefdoms to mighty states and ...
