### **Immanuel Kant Theory Of Knowledge**

Immanuel Kant (1724-1804) Kant's most original contribution to philosophy is his "Copernican Revolution," that, as he puts it, it is the representation that makes the object possible rather than the object that makes the representation possible [§14, A92/B124, note]. This introduced the human mind as an active originator of experience rather than just a passive recipient of perception.

Kantian ethics refers to a deontological ethical theory ascribed to the German philosopher Immanuel Kant. The theory, developed as a result of Enlightenment rationalism, is based on the view that the only intrinsically good thing is a good will; an action can only be good if its maxim - the principle behind it - is duty to the moral law. Central to Kant's construction of the moral law is the ...

A "straw man" is an odd metaphor to apply to such an enormous, cumbersome, ponderous construction as Kant's system of epistemology. Nevertheless, a straw man is what it was—and the doubts, the uncertainty, the skepticism that followed, skepticism about man's ability ever to know anything, were not, in fact, applicable to human consciousness, because it was not a human consciousness ...

A coherence theory bases the truth of a belief on the degree to which it coheres ("hangs together") with all the other beliefs in a system of beliefs (typically one person's beliefs, but it could be any body of knowledge). In philosophies of idealism, all the ideas or beliefs are said to cohere with one another, perhaps because the world is reason itself or created by a rational agent.

Tabula rasa (Latin: "scraped tablet," though often translated "blank slate") is the notion, popularized by John Locke, that the human mind receives knowledge and forms itself based on experience alone, without any pre-existing innate ideas that would serve as a starting point. Tabula rasa thus implies that individual human beings are born "blank" (with no built-in mental content), and that ...

Mind-Body Identity Theory is the idea that the mind is just a part of the physical body. Mind-brain identity theorists like to say that "mental states" are "brain states," but we will see that much more than abstract "states," "events," "properties," and "laws" are involved in explaining how the mind emerges from the brain.
