Lubricant Products - Colonial Fuel & Lubricant Services, Inc.

Many aerospace primes, and leaders in other industries, are requiring use of Solid Film Lubricants for the protection of parts instead of using oil as a lubricant.

Solid or Dry Film Lubricant - Magnetic Inspection Laboratory

Grease is a semisolid lubricant. Grease generally consists of a soap emulsified with mineral or vegetable oil. The characteristic feature of greases is that they possess a high initial viscosity, which upon the application of shear, drops to give the effect of an oil-lubricated bearing of approximately the same viscosity as the base oil used in the grease.

Grease (lubricant) - Wikipedia

Compounds For Every Application Engis offers two formulations for mold and die polishing: Engis® brings more than seven decades of experience to its manufacture of precision diamond compounds.
