This section contains links to thousands of pages of information about plants. The best way to view this site is to search for a plant or a keyword.

### **Information for Home Growers | Department of Horticulture**

Gardening is the practice of growing and cultivating plants as part of horticulture. In gardens, ornamental plants are often grown for their flowers, foliage, or overall appearance; useful plants, such as root vegetables, leaf vegetables, fruits, and herbs, are grown for consumption, for use as dyes, or for medicinal or cosmetic use. Gardening is considered by many people to be a relaxing activity.

### **Gardening - Wikipedia**

Landscaping and garden design can simultaneously address aesthetics and amenity, water management, air quality, climate modification, biodiversity, habitat creation and local food production — and it can help warm and cool your house. The planning and design of outdoor space

should be considered an integral part of your home's sustainable design.
