### **Project Management In The Fast**

The Project Management Triangle (called also the Triple Constraint, Iron Triangle and "Project Triangle") is a model of the constraints of project management. While its origins are unclear, it has been used since at least the 1950s. It contends that: The quality of work is constrained by the project's budget, deadlines and scope (features).; The project manager can trade between constraints.

### **Project management triangle - Wikipedia**

Schedule compression refers to techniques used when a project manager wants to shorten the duration of the project without changing the scope of the project. It can be used when a project falls behind schedule and needs to catch up, or to finish the project sooner than originally scheduled.
