Build a Robot for Free! Ok now the motors. For an optimal robot choosing motors would involve calculations of weight, gearing ratios, desired terrain, desired velocity and acceleration, voltage, power consumption, controllability and a whole range of things too overwhelming for a beginner. So just wing it.

Introduction. Imagine inviting your friends over for a dance party. You've got delicious snacks and some great music on, but when they walk in the door it's not you they see dancing around, but a dancing robot! In this project you will build a robot, like Flippy the dancing robot, shown in Figure 1, that can dance, flip, and tumble around the floor.
