To prevent too much liquid being lost from the child's body, an effective oral rehydration solution can be made using ingredients found in almost every household. One of these drinks should be given to the child every time a watery stool is passed. Ideally these drinks (preferably those that have been boiled) should contain: starches and/or sugars as a source of glucose and energy, some sodium ...

Making every connection personalBeing consumer-centric is complicated, but that's where Eliza comes in. We've found that true engagement and behavior change requires empathy and understanding of the barriers that individuals within a population face, and incorporate that understanding into our engagement design. It requires the ability to move beyond simple one-way,
