

The Delicate Dependency

The Delicate Dependency

Path dependence explains how the set of decisions one faces for any given circumstance is limited by the decisions one has made in the past or by the events that one has experienced, even though past circumstances may no longer be relevant.. In economics and the social sciences, path dependence can refer either to outcomes at a single moment in time, or to long-run equilibria of a process.

Laxative abuse occurs when a person attempts to eliminate unwanted calories, lose weight, “feel thin,” or “feel empty” through the repeated, frequent use of laxatives. Often, laxatives are misused following eating binges, because the individual mistakenly believes that the laxatives will work to rush out food and calories before they can be absorbed — but that doesn’t really happen.

This is where the danger of precipitated withdrawal arises. With buprenorphine’s strong receptor-binding affinity, when given to a person who is already addicted to heroin, the buprenorphine removes and then replaces the heroin molecules that have already attached to the person’s opioid receptors in the brain.
