To the Totem Forests: Emily Carr and Contemporaries

You might have heard that Canada's forests are an immense carbon sink, sucking up all sorts of CO2 — more than we produce — so we don't have to worry about our greenhouse gas emissions. This ...

Canada's forests actually emit more carbon than they ...

A US-based environmental lobby group recently released a misleading report about tissue and toilet paper that takes aim at Canadian forests and forestry workers. It marks yet another attack on Canadian natural resource jobs and rural and northern towns by U.S. special interests who simply do not understand how carefully and sustainably we manage our [...]

Temperate deciduous forests can be found in the eastern part of the United States and Canada, most of Europe and parts of China and Japan. - NatureWorks

Temperate Deciduous Forests - NatureWorks

Founded by a handful of concerned citizens in 1901, the Society for the Protection of New Hampshire Forests is one of the country's most effective statewide land conservation organizations.

Forest Society

A long tradition of finger weaving is obvious from the intricate examples which have survived from the time of European contact. Finger weaving techniques produced tumplines (burden straps for cradleboards, packs or other loads) and drag straps for sleds or toboggans, belts, sashes, garters or similar items of clothing, and even small bags.
