About one in five Australians will experience difficulties with their mental health at some stage of their lives. One in 200 people will experience psychosis. Mental illness is a general term that refers to a group of conditions and includes schizophrenia, eating disorders, anxiety and depression, and more. These conditions can significantly affect how a person feels, thinks, behaves, and ...

Understanding mental health conditions | Mind Australia

Leading underlying causes of death by age. As well as differences by sex, the leading causes of death also vary by age. Chronic diseases feature more prominently among people aged 45 and over, while the leading causes of death among people aged 1–44 are external causes, such as accidents and suicides (Figure 3.2).

Deaths in Australia, Leading causes of death - Australian ...

Chronic conditions defined. The use of the term ‘chronic conditions’ refers to a broad range of chronic and complex health conditions across the spectrum of illness, including mental illness, trauma, disability and genetic disorders.
